

Knapp Hicks
making it happen

**Structural Engineering
Services**

About Us....

Knapp Hicks provide a range of consulting engineering services including Structural Engineering services for our clients. These services include the appraisal and design of a wide range of structures in all materials.

A Range Of Services

From pre-purchase appraisals and technical advice to full detailed design of major infrastructure schemes, Knapp Hicks provide a diverse range of design solutions tailored to meet all our clients' requirements. These services include:

- Design of major structures
- Small project design
- Residential schemes
- Commercial projects
- Health & Education sectors
- Industrial developments
- Mobile Telecommunication base station design
- New build and refurbishments
- Extensions and alterations
- Due diligence & pre-purchase appraisals
- Structural surveys
- Feasibility studies
- Structural advice to Party Wall Surveyors
- Advice in connection with Insurance Claims

Structural Design

Structural Design has always been the core business of Knapp Hicks and our engineers have vast experience in the design of a wide range of building structures. Knapp Hicks have the expertise to produce economic and structurally efficient solutions regardless of the building form or type of materials used; be it a utilitarian industrial project, a prestigious commercial development or a public building demanding sympathetic treatment of aesthetic requirements.

Structural Surveys & Investigations

Knapp Hicks undertakes structural surveys and provide advice to clients with respect to their own buildings or those they are contemplating buying or leasing, whether it be an individual domestic property or multi-storey structure.

More detailed structural investigations are undertaken on all types of structures. These range from bridges, tunnels & viaducts, to multi-storey buildings and historic structures with a view to providing either factual or interpretative reports with regards to condition, longevity, repair options or planned maintenance requirements.

Due Diligence, Feasibility Studies & Pre-Acquisition Site Appraisals

At an early stage in the acquisition or planning process, when potential development options are being considered, Knapp Hicks are able to undertake detailed site appraisals or feasibility studies. These studies can be fundamental in assessing the viability of any scheme, identifying potential risks to the development and deciding on the most commercially feasible design.
